

# Operations & Markets

Patheon has established a very competitive and geographically diverse network of sites, which enables us to attract great talent, offer a full range of services and build on our impressive list of clients worldwide.

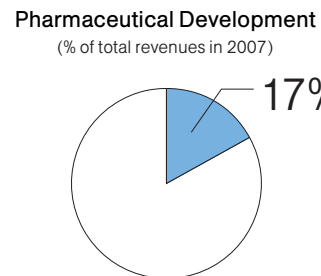

## Commercial Manufacturing

Patheon currently manufactures more than 650 commercial products on behalf of our clients. Our comprehensive services range from conventional dosage form manufacturing through to highly specialized sterile, high-potency and lyophilized manufacturing services.

## Pharmaceutical Development

From start-up in 1995, PDS has grown to a business today of more than \$100 million. The products being developed for clients, if approved, can be an important source of new business for Patheon's commercial manufacturing operations.
