

Leading The Way In Accelerated Development And Product Transfer

Quick To MarketSM is a unique Patheon-only program that offers accelerated transfer of commercially available products from an existing manufacturing plant to a plant within Patheon's network. The program was formally established as a service within Patheon after excellent results and significant client satisfaction with recent rapid product transfers.

The Quick to MarketSM program supplements Patheon's already established Quick to ClinicSM program, which accelerates the development of early stage molecules at pre-clinical status and allows rapid distribution of drug product to phase 1 clinical trials.

The Quick To MarketSM program also introduces the 4-6-8 PromiseSM, which reminds customers how quickly work can be done without compromising the high standards of quality that we're known for.

4

Quick To ClinicSM solid dose molecules will be formulated and ready for distribution to phase 1 clinical trials in just four months from receipt of API.

6

Quick To MarketSM solid dose or liquid products will be transferred and ready for regulatory filing in just six months from receipt of analytical methods and API.

8

Quick To MarketSM aseptic liquid or lyophilized sterile products will be ready for regulatory filing in just eight months from receipt of analytical methods and API.

Patheon Inc. is a leading provider of contract development and manufacturing services to the global pharmaceutical industry. Patheon provides products and services to more than three hundred of the world's leading pharmaceutical and biotechnical companies. Patheon's technologies and services range from pre-clinical development to manufacturing a full array of dosage forms. Our global network of ten manufacturing facilities and seven development centers ensures that customer products can be launched with confidence anywhere in the world.
