Global network
of over

65

sites to support your drug
development journey

74%

of our clients are new and
emerging pharma and bio-
pharma companies

Pharma services
manufactures more
than

100

dosage forms

Your truly integrated pharma services partner

Over the last decade, Patheon pharma services has supported the delivery of more NDA-approved drugs than the next three leading CMOs combined.¹ What's more, we've delivered across all phases of drug development and across the world through our full-service global network.

We helped deliver NDA approvals for both small and large molecules. In addition, we supported many of these molecules through early development, clinical trial material and commercial launch.

Create or source your ingredient	Design the ideal formulation	Scale to your next milestone	Develop clinical supply chain strategy	Accelerate clinical research	Develop successful commercial launch
Route scouting	Quick to Clinic™	Pre-clinical	Clinical supply optimization	Labeling	100+ dosage Forms
Cell line development	Complex formulations	Early phase development	Compliance management & risk mitigation	Primary & secondary packaging	Oral solid dose
Analytical methods	Solubility enhancement	Quick to Care™	Comparator sourcing	Storage & distribution	Sterile injectables
Process development	Analytical methods	Clinical trial material manufacture	Label translation & planning	Global Network	Softgels
Process characterization and validation	Process development	Late phase trials	Clinical ancillary management	Cold chain material management	Commercial drug sample logistics
Commercial manufacturing	Oral solid & sterile development	Commercialization		Logistics & transportation	Primary & secondary packaging
