

Commercial autoinjectors

Simplified packaging solutions

Our experts have extensive experience in the packaging, labeling, and kitting of autoinjector devices. We offer global support from our US, UK and EU facilities by delivering a high degree of technical precision required for the assembly of autoinjectors devices, accurate labeling, quality packaging and rapid production of both small and mid-volume batches.

Locations and capabilities

Our global facilities offer services for the complete manufacturing process of autoinjectors - from filling, assembling, labeling and packaging.

Allentown, PA, USA

Assembly and packaging

Greenville, NC, USA

Manufacturing fill/finish of prefilled syringe

Horsham, UK

Assembly and packaging

Monza, IT

Manufacturing fill/finish of prefilled syringe

Benefits

- Auto-injectors provide an easy and convenient drug-delivery system for patient self-administration -improving compliance and dosage accuracy
- Simplified supply chain offered by integrated solutions for drug product and packaging assembly
- Global facilities for regional and global launches

Capabilities

- Medium and small-scale auto injector assembly and packaging
- Cartoning with tamper-evident options
- Serialization and aggregation
- Fully sustainable packaging solutions for single and multiple auto-injector packaging
- Change parts for various models of auto-injectors
- Manual, semi-automated, and automated labeling options
- Kit assembly solutions to fit your needs

SOLVED WITH INVESTMENT & INNOVATION

patheon

Flexible small and midscale capacities

Small scale capability

- 2 ppm
- Highly flexible
 - Capable of both auto-injector and pen assembly
 - Capable of multiple different pen and auto-injector configurations
- 4 units in operation at site at Horsham UK and 1 unit in Allentown, PA USA

Mid scale capability

- Configured for 25 ppm
- Capable of 50 ppm with automation at loading/unloading
- Assembly and secondary packaging separated
- Flexible secondary packaging line including thermoforming capability
- Located at Horsham, UK site

Our experts provide flexible autoinjector packaging solutions from packaging design to production line efficiency. **Contact your local Thermo Fisher Scientific representative to learn more.**
