

Customs warehouse solution

A simplified approach to mitigate potentially costly UK import customs duty and VAT fees

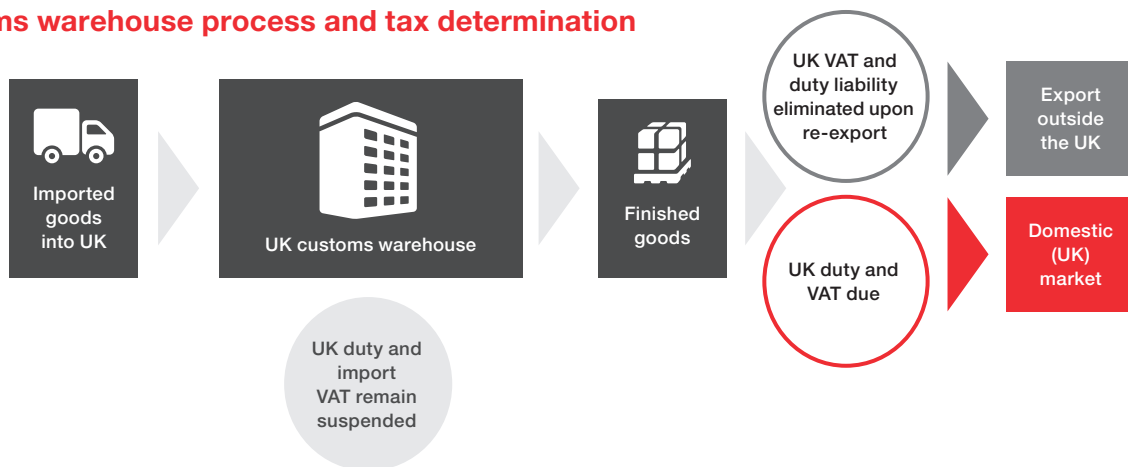

Our customs warehouse solution provides significant advantages to drug sponsors looking to suspend or defer import duties and value-added tax (VAT) on materials entering and leaving the UK. Our customs warehouse solution can positively impact overall material import and export costs.

Benefits

A simple, tax-efficient method to import, hold, process, and export investigational medicinal products, clinical ancillary materials (CAMs), and commercial materials

Customs warehouse process and tax determination

Explore how our customs warehouse solution can play an integral role in simplifying and minimizing the cost of running your UK import and export supply chain. Contact your local Thermo Fisher Scientific representative to learn more: patheon.com/contact-us
