

Clinical ancillary management: flexible and customized order solutions

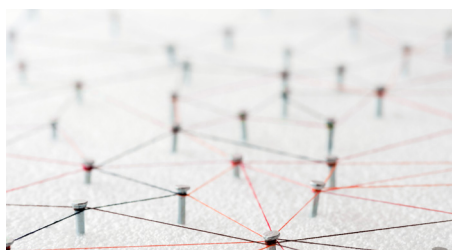

Our clinical ancillary materials capabilities ensure a reliable supply of critical items are assembled, quality-checked, and kitted for global distribution. All service levels meet stringent regulatory and compliance requirements related to each product's intended use and distribution pathway. Our experts also provide tailored support for inventory management and program oversight to help ensure trial continuity worldwide.

Level 1: Custom ancillary supply packs

Low-complexity services that ensure ancillary supplies are boxed, bagged, or consolidated for simplified shipping.

- Fast turnaround times
- Waste minimization
- Low-cost service options
- Consolidated shipping

Level 2: Adaptable patient supply packs

Medium-complexity supply strategies designed to align with any clinical trial schedule and adapt to the changing needs of patients and product recipients.

- Tailored to protocols, visits, and timelines
- Convenient for patient needs
- Flexible supply bundles

Level 3: Global kitting services

Strategic, high-complexity kitting services designed to support controlled and scalable clinical trials.

- Global strategy for worldwide kitting
- Comprehensive batch record documentation
- Expiry management and oversight
