# Introducing Thermo Fisher Scientific's Omni Client Warehouse

## Connect directly to your data

Utilize the capabilities of Omni Client Warehouse on a protocol-by-protocol level, to seamlessly access and use your transactional and performance data. This robust infrastructure enables the creation of individualized reports empowering your organization to leverage data effectively, ensuring it works for you, following your unique requirements and preferences. Make your data work for you, your way.

There are three types of licenses available for protocols in your warehouse:

Core	Enhanced	Enhanced Plus
<ul style="list-style-type: none"><li>• Quality data for all protocols</li></ul>	<ul style="list-style-type: none"><li>• Quality data for all protocols</li><li>• Operations data (packaging, distribution, receipts, inventory)</li></ul>	<ul style="list-style-type: none"><li>• Quality data for all protocols</li><li>• Operational data (packaging, distribution, receipts, inventory)</li><li>• From 2025 Q3, finance and commercial data (quotes, purchase orders, invoices)</li></ul>

### Key benefits

- ➔ Access to your transactional and performance data provides full transparency
- ➔ Unblinded data enables visibility into areas not available in your Omni Client Portal (e.g., inventory)
- ➔ Integrate with your consuming systems (e.g., ERP, analytics platform) to process data in a CDC-compliant manner
- ➔ Expand upon and compliment existing reports already available in your Omni Client Portal
- ➔ Use this platform to create custom data views to enhance your data-driven decision making and operational efficiency
- ➔ Flexibility to access data on a protocol-by-protocol basis, at different license levels
- ➔ Export data to create ad hoc views within Microsoft™ Excel™ software and other common spreadsheet software
