

SOLVED WITH

PRODUCTIVITY & CONVENIENCE

patheon

A PDMA-compliant suite of mobile/web apps that optimize sales representative productivity and enhance practitioner convenience and service.

Convenience at your fingertips

OnTheGoSM services are available as downloadable mobile applications and via web portal access. These services complement the Patheon specialty logistics sample distribution service offering by providing Sales Representatives and Managers with enhanced capabilities.

Sample Request Form

- PDMA-compliant paperless sample request form with e-Signature
- Easy-to-use interface with touch screen support

Acknowledgement of Contents

- Enables closing AOC by capturing Health Care Practitioner (HCP) electronic signature
- Ensures HCP compliance and continued receipt of samples

Sample Allocation Management

- Provides Sales Representative visibility
- Allows Corporate/Regional/District Managers to adjust

OnTheGoSM Services

Innovative & Optimized Solutions

OnTheGo SRF

(Sample Request Form)

- PDMA-compliant paperless sample request form
- Enables generation of Sample Request Form for delivery via email to Representative and/or Practitioner
- Easy-to-use interface with touch screen support
- Captures electronic signature via touch screen

OnTheGo AOC

(Acknowledgement of Contents)

- Facilitates closing AOC during on-site visit with HCP
- Reps can search unsigned AOCs by various criteria (name, zip, order #, etc.)
- Displays open AOC on the sales representative's handheld device
- Accepts eSignature allowing HCP to continue receiving samples
- Captures electronic signature via touch screen

OnTheGo SAM

(Sample Allocation Management)

- Enables Brand Managers/designees to capture allocation project scenarios
- Enables Brand Managers/Regional Managers/District Managers to update/change allocations
- Provides top down or bottom up allocation distribution schemes and individual quantity editing
- Enables "hold" quantities at national, regional, and district levels to distribute later
- Allows allocation quantities to be moved up, down and across the Rep territory hierarchy based on user defined permissions
- Can be integrated with client sample ordering tool and/or fulfillment vendor order fulfillment tool to provide current "remaining allocation" values
- Provides reporting and data export to MS Office tools
