patheon

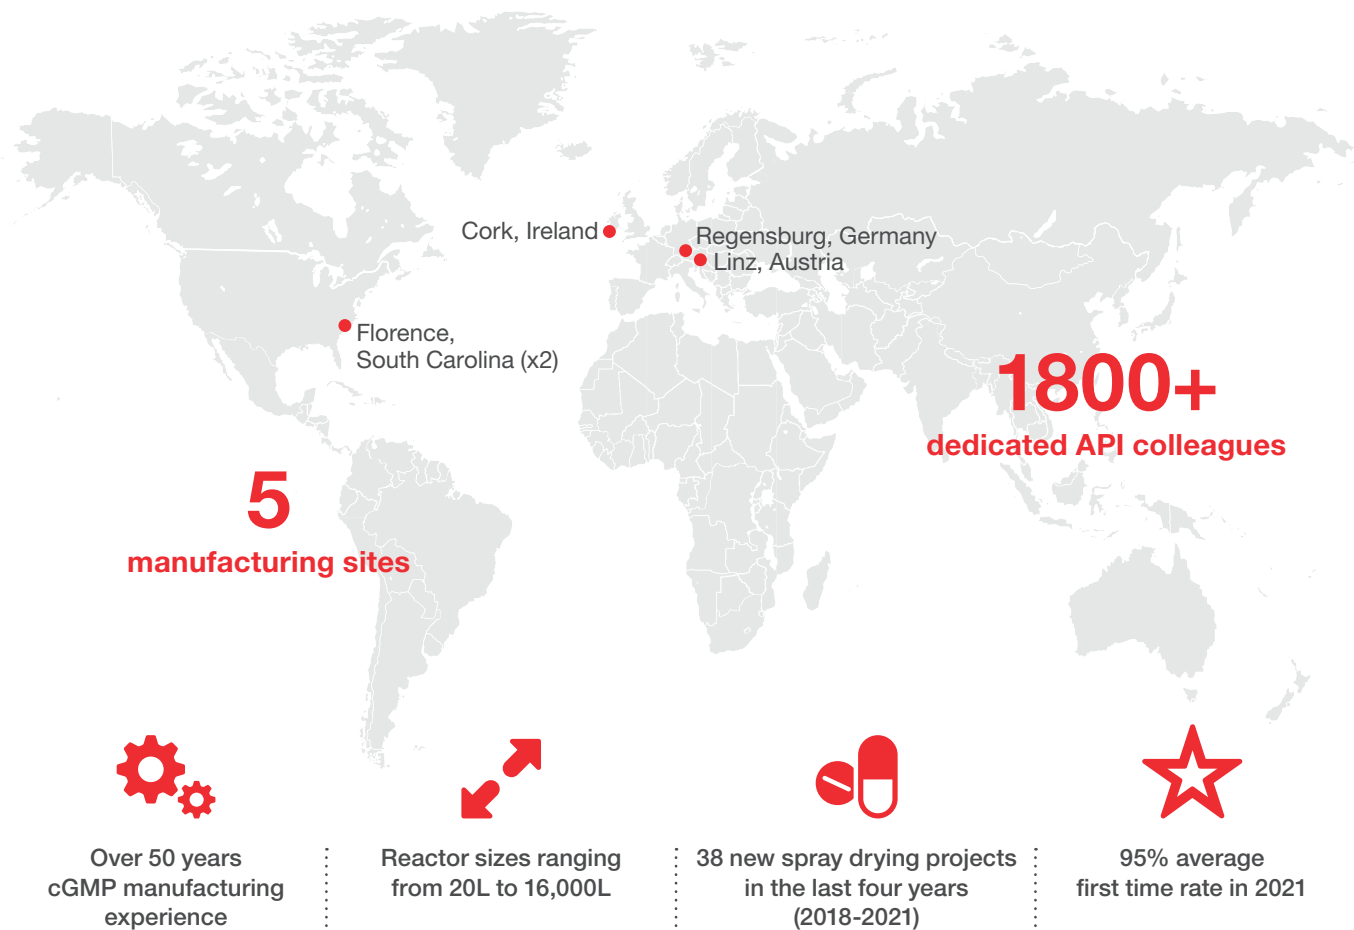

Small molecule API solutions

From early process optimization and scale-up to commercial production, we provide key services across the lifecycle to get your project to market. Our focus is always on your molecule—whether you require standalone API services or fully integrated end to end drug development, we'll act as extension of your team. Combining the power of deep scientific expertise, industry-leading technology, and the backbone of a global network, we're dedicated to get you closer to your goal.

Solutions from pre-clinical to commercial

Pre-Clinical	Clinical supply PI-III	Commercial manufacturing
Process development	Process optimization and scale-up	Validation and successful commercial supply launch

<p>Speed up your product development pathway by integrating API supply with Drug Product Services:</p> <ul style="list-style-type: none"> Formulation development Analytical method development Clinical trial material Clinical label/pack/distribution 		<p>Simplify your supply chain and launch your product with integrated API and Drug Product Services</p>

API drug substance sites

Integrated solutions to streamline your drug development journey

Quick to Clinic

Meet your phase I milestones with Quick to Clinic™ for small molecule oral solid dose, an integrated offering accelerating your molecule to First in Human studies.

Quick to Care

Customize your drug development needs with Quick to Care™, an integrated offering to simplify the supply chain across all phases of product development.

Learn more about our extensive API development and manufacturing offerings.
