

DELIVERED WITH PRIORITY & PRECISION

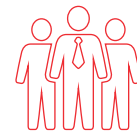

patheon

Providing services that span your entire product life cycle.

Eliminating risk in your clinical trial supply chain, because you can't afford to have your shipment delayed.

Ensuring product integrity through strict adherence to regulatory guidelines.

Logistics Solutions for High Value/ High Risk Shipments

We have a proven track record of providing high-touch transportation of time and security-sensitive shipments. Our clients turn to us because we consistently perform at the highest standards, providing a broad range of services to meet their unique needs.

We provide a consultative solution design focused on defining client and situation-specific solutions, driving cost savings and reducing time-in-transit. We provide a cost effective service through the flexibility of our offerings and by leveraging corporate resources and carrier/supplier agreements.

We work directly with many of the leading manufacturers in temperature controlled packaging to design a best fit solution. We use shipper and cooling technology from multiple industry-leading manufacturers. If specialized packaging is required due to size, duration, destination, or other factors, we will work directly with our vendors to design unique storage or transport shippers to fit these needs as well.

Because we are Life Science focused, we ensure GxP compliance by adhering to global standard operating procedures (SOPs) and by maintaining essential industry certifications. We adhere to impeccable quality standards, and provide service levels that exceed client expectations.
