

Clinical trials

Autoinjector, pen, and prefilled syringe capabilities

Scale- and platform-flexible autoinjector, pen, and prefilled syringe capabilities, from manual to fully automated, simplifying your biologic drug development supply chain

Phase I

Phase II

Phase III to commercialization

Thermo Fisher Scientific can support you across the biologics development and commercial life cycle

As you progress through your trial phases, Thermo Fisher can evolve with you through your changing fill-finish needs—from vials in Phase I/II to prefilled syringes, pens, and autoinjectors in Phase II/III and commercialization.
